Workplace Digital **Transformation**

As businesses reopen their physical locations trust the teams at Elo and 22Miles to lead the digital transformation within your facility. Organizations can leverage better safety and agility with visitor management check-in content, staff access control integrations, room and hot desk booking solutions, 3D wayfinding for better interactivity and mobile, Temp scanning, and even push notifications to maintain a safe building environment.

Key Trends:

Automation
Implement technologies to automate day-to-day employee and visitor traffic flow – including a virtual receptionist, contactless access control and meeting room management.
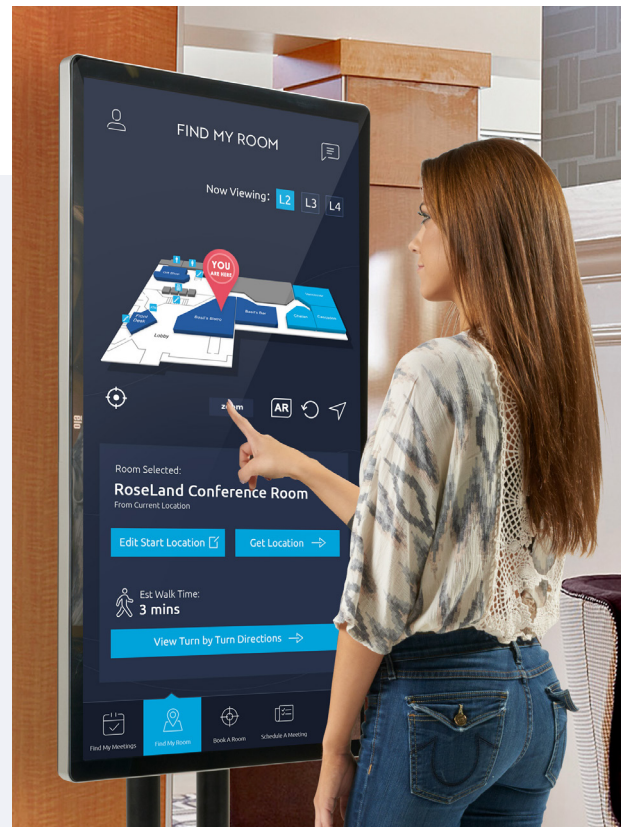

Wellness Screening
Employees and visitors want to feel safe when they return to work. By implementing visible screening processes and other safety measures, can significantly lessen apprehensions about being in the office.
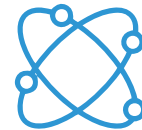

Collaboration
Interactive video conferencing will be essential to the new hybrid work environment of office-based and remote employees. Adding an interactive whiteboard with video conferencing camera, remote workers will feel included in onsite meetings.

Space Management
With hybrid workforces becoming the standard, rethinking the use of your real estate and the strategy around how desks and private meeting rooms are used will become more important.

Elo & 22Miles Advantage

**Seamless Integration**

Solutions for all Endpoints

Enterprise-Grade Hardware

Wellness Screening

22Miles advanced software features include: Temperature Reading, Face Mask Detection, Badge & Wrist Band Printing, Employee ID Integration for Access Control, Visitor Check In, and Video Calling.
15-22" I-Series AiO | Wallaby™ Self-Service Stands
Edge Connect™ Temperature Sensor Pro
