Product Notice: 1517L & 1717L Touchscreen Monitors

Product Information

As part of an upgrade to the 1517L and 1717L touchscreen monitors, we are adding HDMI functionality to the current product portfolio. This feature add will roll into the existing SKU's without changing or removing any of the functionality that currently exists in these products. This provides continuity and easy transition for our customers. Additionally, the 1717L products are updating to a default brightness of 80% in compliance with the latest regulatory requirements.

Transition Details

- New product with HDMI is now in production and beginning to ship around the world.
- Stock with HDMI will temporarily mix as we sell through existing inventory and replace with HDMI product.
- Please consult with your sales representative for specific part numbers and details.
